SUMMARY

Computer Science Engineering graduate with a solid foundation in Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), and modern software engineering principles. Hands-on experience developing full-stack web applications, architecting relational database schemas, and implementing responsive client-side interfaces using native DOM manipulation and modern frameworks. Proficient in Git version control workflows, RESTful API integration, and the full Software Development Life Cycle (SDLC). Analytical problem-solver skilled in writing clean, scalable, and maintainable code within collaborative engineering teams.

TECHNICAL SKILLS

Languages: Java, C, Python, SQL, JavaScript

Web Technologies: HTML5, CSS3, DOM Manipulation, RESTful APIs, Responsive Web Design

Frameworks & Libraries: React.js, Node.js, Express.js

Databases: SQL, MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, VS Code

Concepts: OOPs, DSA, SDLC, Design Patterns

PROJECTS

Algorithm Visualizer | **Full-Stack Web Application** | [Project Link](#)

Tech Stack: *HTML5, CSS3, JavaScript (ES6+), Node.js, Express.js, SQLite3, Git, GitHub*

- **Interactive DSA Visualizations:** Built an interactive full-stack application to visualize sorting algorithms (Bubble, Selection, Insertion, Merge, Quick, Counting) and searching algorithms (Linear, Binary) with step-by-step animations.
- **Dynamic Control Features:** Implemented real-time execution controls—including speed adjustment, pause, resume, reset, and custom input arrays—to enhance user engagement and learning.
- **Backend Integration:** Developed RESTful backend logic using Node.js and Express.js paired with an SQLite database for structured data management and project scalability.
- **Modular UI/UX:** Designed a clean, responsive frontend using custom CSS and modular JavaScript (ES6+) following reusable component principles for future expansion (e.g., Graph/Tree algorithms).

Interactive Developer Portfolio | [Portfolio Link](#)

Tech Stack: *HTML5, CSS3, JavaScript (ES6+), Git, GitHub*

- DOM manipulation to handle dynamic UI state toggles, outside-click menu dismissals, and client-side input validation using native browser APIs.
- Implemented accessible responsive UI components, dynamic scrolls navigation, and compact mobile drawer interactions across mobile and desktop viewports.
- Automated live hosting and version management using Git and GitHub Pages.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering | Affiliated with **MAKAUT**

Academy of Technology, Hooghly (WB) | CGPA: 7.60 / 10.0 | Graduated: Expected Aug 2026

CERTIFICATIONS & TRAINING

- **Talentnext course on Data Science** | Issued by **Wipro** | October, 2025

ACHIEVEMENTS & ACTIVITIES

- Participated in the “**UXOPIA**” event 2024; developed a UI for a payment app and a business website.
